The primary forest at night is a completely different and unique experience than during the day. Something similar happens with the activity of some amphibians, reptiles, mammals, and some species of exotic flowers that only bloom at night. Mistico Arenal Hanging Bridges Park offers its guests the opportunity to observe the forest in the dark of the night with the Mistico Night Walk. The tour is in our trails passing through the hanging bridges. It is also possible to observe animals as frogs, snakes, lizards, mammals such as Kinkajou, coati, cauceles or margays, nocturnal birds such as the owl and the barn owl in addition to the edge of the nocturnal species that inhabit the reserve will give the guest a spectacle in the magical setting of the darkness of the night.

On arriving at the park we set off on a 7km (approximately 4 miles) hike which passes by the River Celeste Lagoon, a great place for taking photographs. The hike continues on through the mountains on rough paths into the jungle discovering an area of the volcano where gasses are expelled at very high temperatures. At the end of a steep but interesting walk down, we get to see, in all its splendor, the Rio Celeste Waterfall which is impressive not for its size but for its unique colors.
